

## Application for the Young Science/Engineering Speaker at UTHF 2011

The annual US-Taiwan High Tech Forum (UTHF, [www.natea.org](http://www.natea.org)) has been a long tradition of NATEA-SV. The Board of Directors of NATEA-SV strives to invite the best speakers to present and share their accomplishments and insights to the Silicon Valley technology and science community at the UTHF forum. This year, the theme of the UTHF forum is Sensors. Typically we have more than 100 conference attendees and we have been graced with numerous industry and academic luminaries speaking at UTHF.

Starting this year, the board of NATEA-SV has decided to set aside time at UTHF for a (distinguished) young engineer/scientist to present his/her excellent work. If you have made significant accomplishments in the field of sensors, we encourage you to apply to present at this year's UTHF. The applications will be reviewed and be selected by a board consisting of scientists, technologists and the board members of NATEA-SV. The winning applicant will be awarded a spot to present his/her work at UTHF 2011. In addition, a \$500 scholarship will be granted if the winner is currently a student enrolled in an accredited educational institution.

This is an excellent opportunity for you to present your achievements and help advance your career.

To qualify, you need to meet one of the following criteria:

1. A student enrolled in an educational institution accredited by the U.S. Department of Education
2. You have obtained your highest educational degree within the last five years.

To apply, please submit a short abstract or paper of your research, your current job/position title, and your employer information by 9/20/2011.

Please send your application to

Johnson Liu, [coolsuntraveler@gmail.com](mailto:coolsuntraveler@gmail.com)

We look forward to reading your applications.

Sincerely,

NATEA-SV Board of Directors.
